

Implementation date and additional rounds

2016

Tobacco products package coverage and location

Graphic health warnings are required to cover the top 60% of the front and 60% of the back of the package. Overall, 60% of the package space is allocated to health warnings.

Misleading information

Misleading descriptors such as ‘low in tar contents,’ ‘light,’ ‘ultra-light,’ and ‘mild,’ are prohibited from appearing on packages.

Constituents and emissions information

Tobacco packs and cartons are required to display qualitative (descriptive) constituents and emissions information. However, the content of the message has not been issued.

Special notes

Legislation applies to all tobacco products (combusted and smokeless) without specifying the content of the warnings for each type of tobacco.

Rotation schedule, history, language, and help for smoking cessation

Burkina Faso has produced one round of graphic health warning labels:

Round (year)	Number	Size (%) [average— front/back]
R1 (2016)	2	60— 60/60

Warnings within each round are required to be rotated for a period of 2 years. One warning is to be displayed for the first year and the second warning is to be displayed for the next year. Warning texts must be in French, and also in the other principal national languages of the country. No quitline phone number or government-sponsored website is required to be displayed on the package.
